

Architectural and Engineering Technology

- Architectural and Engineering Technology (formerly Computer-Aided Design) graduates work alongside architects and engineers designing buildings or machinery, and developing the drawings needed for constructing or manufacturing.
- As a Architectural and Engineering Technology graduate, you will be entering a career as an integral part of an architectural, civil, or mechanical firm.
- This program is well-suited to detail-oriented people who enjoy hands-on creation from start to finish.
- You will utilize the latest software by Autodesk and others, and work with cutting edge hardware such as augmented and virtual reality, 3D Printing, global positioning systems (GPS) and Unmanned Aerial Vehicles (UAV).

The Architectural and Engineering Technology program (formerly Computer-Aided Design) at Western Dakota Technical College equips students with the skills and knowledge necessary to produce accurate technical drawings using industry standard CAD systems. According to the U.S. Bureau of Labor Statistics, in May 2021, the average wage in western South Dakota was \$46,830.

Why Western Dakota Technical College?

We deliver a personal, career-oriented education ideal for the student pursuing a meaningful profession and prideful future. Faculty, staff, and administration are committed to teaching the knowledge, skills, and behaviors students need to be successful.
