

Health Information Management

- Graduates can perform a variety of jobs in Medical Administration such as medical coding, medical billing, records management, revenue cycle management, and private practice management.
- The education and coding certification is nationally recognized so you can work in all 50 states without re-testing, as long as the credential is maintained and continuing education requirements are met.
- This program also provides education and training in soft skills such as communication, teamwork, interpersonal skills, and attention to detail.

The primary objective of the Health Information Management program is to prepare students with the necessary skills to work in the medical field maintaining a patient's health information. According to the U.S. Bureau of Labor Statistics, in May 2023, the average wage in South Dakota was \$52,680.

Why Western Dakota Technical College?

We deliver a personal, career-oriented education ideal for the student pursuing a meaningful profession and prideful future. Faculty, staff, and administration are committed to teaching the knowledge, skills, and behaviors students need to be successful.
