## REGISTERED NURSING

### Associate of Applied Science, 41 Credit Hours, 14-Month Program

This degree will provide a 1 + 1 bridge track for graduates of an LPN program who hold a current LPN license. This program is designed for students with a goal of advancing their nursing career which includes opportunities in hospital, long-term care, clinic, assisted living, and other settings. This program will allow individuals to expand on the technical and communication skills obtained through their LPN licensure. Students will be trained in the areas of science and technology, advanced nursing skills, problem solving and critical thinking, professionalism, and communication, as it relates to nursing.

Students in the second semester technical courses of the Registered Nursing program must successfully meet benchmark scores on the required exit exam in order to graduate. All students successfully completing the Registered Nurse program will earn an AAS degree in Registered Nursing and will be prepared to take the licensure exam to enter the workforce as registered nurses (RNs).
